Project Quote Request

Since the HVAC equipment and attic floor boards have covered the hallway area nearest to Marc's office, it was necessary to install the initial WAP just outside the conference room door at the top of the stairs. Although there is decent enough signal in Marc's office, it is possible to install another WAP inside Marc's office to boost the signal in that side of the building.

Personal Note from Richard Ozsvath

Hello Marc - As mentioned in our meeting yesterday we could install a second access point just inside the door in your office. This would boost the signal in that side of the building. I'll not charge anything for the installation service. Thank you for the opportunity, do I have your approval to proceed with the order? - Rich

Implementation Services

One-time Fee

Structured Cabling Upgrade Service

\$0.00

Standard Scope of Work-> <https://bit.ly/40IMYtd>

Structured Cabling Upgrade Service

- See appendix for the Structured Cabling Upgrade standard Scope of Work.
- Drop a new segment to a spot just above Marc's office door where the new AP will be installed. Route the cable so that it cannot be stepped on and tripped over while folks are working in the attic
- Punch down to the server closet patch panel and to a RJ45 jack with single-gang box in the attic. Will need short 6' cable from the termination point in the attic, through the ceiling to the installed AP.
- Price includes ONSITE service
- Price includes mileage costs for technician's use of their personal vehicle
- Installation fee includes all needed cabling hardware: cable, RJ45 jack, mountable box.

Enterprise Wireless Deployment

\$0.00

Standard Scope of Work-> <https://bit.ly/3AGFv3n>

Enterprise Wireless Deployment

Addendum to the Standard Scope of Work

- Preconfigure the AP before actual installation.
- Install the AP mount to the ceiling inside Marc's office, just inside his door.
- Install a PoE injector at the Comcast gateway side. Install the AP to the ceiling mount. Connect the cables and bring the WiFi online.
- Test for proper operation and sufficient speeds throughout the upstairs offices.
- Price includes BENCH and ONSITE service
- Price includes mileage costs for technician's use of their personal vehicle
- Estimated time to complete: 2 hours
