Quote Request

Email request from Marlene, "We have a new employee starting on Nov 14th. I was wondering if either of two desktop computers in the sales room would be adequate for an assistant project manager. She would need access to Adobe Pro, Excel, Microsoft projects and MSWord. Would either of these computers be sufficient, or do we need to set up newer equipment for her?"

Personal Note from Richard Ozsvath

Hello Marlene - The ThinkBook is a nice powerful machine for the money. I've extended the warranty from the base 1 year to 3 years. Also included a dock that allows for up to 3 external monitors. I've also included onsite delivery and setup. The laptop is in stock and with quick approval we can have it installed by this Friday. - Rich
