Email from Charlotte, "Can you please check to see if another program is out there to replace Omni form. We are getting more Trinidad customers and really need something that works properly and doesn't change back to what was there before when it feels like it. And we need our current address on documents not the old etc. And something that Chelsea and I can both have on our computers."

Personal Note from Richard Ozsvath

Hey Charlotte - As you are aware, the company that developed OmniForm went out of business quite a long time ago and that software is no longer developed. The closest replacement is FormDocs. I've previously done the research on this product and double checked that it is still in development, available, and fully supportable, which it is. Let me know if we have your approval to proceed with purchasing the software and starting the migration project. - Rich

FormDocs Scan & Fill Designer - FormDocs Scan & Fill is professional forms management for businesses wanting to more fully automate their paperwork using electronic forms.

- Scan and convert your paper forms to fill-able FormDocs forms. Also convert Word, PDF, and other files to fill-able FormDocs forms. Saves hours of form-design effort.
- E-Mail as PDF to your customers and business partners completed forms such as bid proposals, inspection reports, purchase orders and invoices. Those recipients can immediately view and print the forms as soon as they arrive in their in-box. Eliminates the delay and expense of postal mailing or faxing!
- Attach relevant photos, drawings, documents or files to any FormDocs form. This lets you save an unlimited amount of associated information with a form so that you can keep everything together in 'one place'.
- Capture handwritten signatures using a Windows Tablet computer or popular signature pad devices from Topaz and Interlink.
- Optionally add rich decision-making intelligence to your forms using Forms Automation Basic (FAB) scripting. Express your Business Rules with IF..THEN..ELSE statements that can automatically validate, skip-over, go to, or correct the information you enter. Or add custom buttons and menus to your forms!
- Automatically organizes up to a million records in FormDocs' simple-to-use, zero-administration Forms Database.

FormDocs Filler - FormDocs Filler is the affordable way to give everyone in your organization the ability to fill-in forms, on both networked and standalone computers.

- Lets multiple users on a LAN or VPN concurrently open and share forms in a FormDocs Forms Database - without overwriting each other's work. FormDocs is the only forms software that provides this critical file-sharing, record-locking safety feature! See how...
- Lets users save and share forms in Sharepoint storage or in Cloud storage including Dropbox, OneDrive, Google Drive, Microsoft Azure, and Amazon WorkDocs.
- Provides Digital Signatures so you can optionally approve, secure, and authenticate the information on your Forms. Helps you to achieve compliance with Sarbanes-Oxley, HIPAA, and other mandates that require you to ensure the integrity of your information and the accountability of users who enter and modify that information.
- Provides Forms Routing so that you can optionally send your

forms to other FormDocs recipients in a sequential fashion in order to obtain their input and/or digital signature approval. Enables you to create simple and effective workflow without the typical expense and administration.

- Does not include any FormDocs Designer or form templates. At least one FormDocs Designer must be purchased separately in order to create fill-able forms.

Form Software Migration Service

\$875.00

- Convert up to 5 existing forms to new format and then tweak to make sure they are working properly
- Import existing databases as needed to new database.
- Price includes BENCH and REMOTE service
- Estimated labor 4-6 hours
